

31

- 5 or 6 players at each table
- Each player receives 3 cards
- The object of the game is to gather the highest score in your hand. These cards must all be in the same suit. To accomplish this, each player in turn, draws one (1) card from either the deck or the top card from the discard pile. The player then discards one (1) card, maintaining 3 cards.
- The points awarded to each card are as follows:
 - Ace.....11 points
 - King, Queen, Jack & 10.....10 points
 - All other cards are face value.
- Once a player feels he has a good hand after a round of play, he may knock and the play will continue for one more round ending at player who knocked. Hands are revealed and the Low Score pays one token. If in the event that 31 is hit at anytime during play, all other players forfeit a token.
- If all Cards in the deck are used up, shuffle and turn the deck over.
- When a player loses all three tokens, they are out of the game. There is no honor.
- The remaining players continue playing until only one player remains with a token, and then that player will go to the play off.
